MESSAGE TO CURRENT H.E.R.H. STUDENTS:

Students are expected to review and discuss course selections with parents/guardians prior to submitting their course requests. Students will complete course selections electronically through the Student/Parent Portal of PowerSchool. Students will log on to PowerSchool (<https://sisccrsb.ednet.ns.ca/public/>) with their PowerSchool username and password. Online course requests must be completed by **Thursday, March 23, 2017**. Instructions are available on our school website (herh.ccrsb.ca).

Students are advised to read this document carefully in order to make informed choices for their academic future. It is critical that all selections made by students reflect graduation requirements, personal interests and needs.

Please keep this book for future reference.

COURSE CHANGES

Course selections made in the spring for the next academic year are generally considered final. Course changes may not be made unless:

1. The scheduling process has resulted in an incomplete schedule
2. A course and its pre-requisite are in reverse order on a student's schedule
3. A course is scheduled for which a credit has already been granted
4. A student did not pass a required course and must retake it.
5. Student request was not granted due to a conflict with other courses
6. A potential graduate lacks a required course to complete graduation requirements.
7. A student is scheduled in a course without the recommended pre-requisite course
8. A potential graduate is able to complete graduation requirements in a single semester
9. Student's post-secondary plans have changed.

Course changes in September will not start until the third day of classes. **Please ensure you select your courses carefully to limit the need for course changes.**

PLANNING YOUR PROGRAM

Prior to registration, you should carefully consider your post-high school goals and the educational requirements necessary to achieve them. Select the courses and level of difficulty that will enable you to achieve these objectives. Plan your program into the future as far as possible. Some subjects such as Math, Physics and French have pre-requisites. If a course has a pre-requisite, it is listed in the course description. Occasionally, it is necessary to cancel a proposed course due to insufficient enrollment. The school reserves the right to not offer the course as described in the booklet should unforeseen circumstances arise. Care should be taken in the choice of subjects to ensure that you meet the entrance requirements of the post-secondary or career path institution of your choice. If you are unsure of your course selection for next year, check with one of the guidance counsellors prior to registration. Course selection is also important for those going directly to work after graduation.

Students are encouraged to keep the course worksheet, and enter marks as courses are completed to keep track of their progress until graduation.

POST-SECONDARY ENTRANCE REQUIREMENTS

Students must realize that requirements for universities/colleges and other educational institutions vary considerably and are subject to change. It is advisable to consult calendars frequently when making long-range plans. All universities require at least five Grade 12 academic or advanced courses, included academic or advanced English 12. Requirements for community college and other post-secondary institutions vary according to the institution. Students should check with university and college websites and Student Services on entrance requirements.

Averages required for entrance vary; however, students are advised that in many instances, achievement of minimum requirements in no way guarantees acceptance. This is particularly true for specialist diplomas such as Computer Science, Engineering, Nursing, etc. Be advised that Nova Scotia Community College accepts applications from students once they have completed grade 10.

Most universities do not accept "Open" or "Graduation" credit type courses. In addition, some Academic type credit courses are not acceptable. Acceptance of specific courses vary from one educational institution to another, and students should consult institution calendars carefully before making final course choices. When in doubt, email admissions of the university.

Choose courses according to your own abilities and need. A guidance counsellor is available for interviews with students and/or parents. Appointments can be arranged by phoning 758-4622 or by booking an appointment with Cathy in the office.

REQUIREMENTS FOR HIGH SCHOOL GRADUATION DIPLOMA

A total of **EIGHTEEN** credits are required to obtain a High School Graduation Diploma. The following 13 compulsory credits from the following subject groupings must be taken and **passed** for students to be eligible for graduation:

Language, Communication, and Expression

- 3 **English Language Arts**, one at each grade level
- 1 **Fine Arts** (Art, Dance, Drama, or Music)

Science, Mathematics, and Technology

- 2 **Mathematics** (two different grade levels)
- 2 **Science** (ONE from Biology, Chemistry, Science 10, or Physics, **and** one additional approved science course)
- 2 **others** from Mathematics, Science, or Technology

Note: Dance 11 may count as a fine arts credit or a physical education credit, but not both.

Personal Development and Society

- 1 **Physical Education High School Credit**
- 1 **Canadian History**: African Canadian Studies 11, Canadian History 11, and Mi'kmaw Studies 10 or 11 fulfill this requirement)
- 1 **Global Studies** (from Global History, Global Geography, or Global Economics)

At least **Five** (5) credits **must** be at the Grade 12 level, and no more than **SEVEN** (7) may be at the Grade 10 level. *Students are eligible to take all three Global Studies courses, if desired.*

Please Note: The above are minimum requirements for graduation, and may not be sufficient to allow a student to meet the entrance requirements for all post-secondary educational institutions.

CREDIT SYSTEM

A credit is awarded to students who have successfully completed an approved course that would normally be completed in a minimum of 110 hours of scheduled class time (usually 1 semester). Some courses are compulsory in order to receive a High School Graduation Diploma, while others are optional. Sometimes a course requires a pre-requisite course; this means there are courses which must be passed before another is attempted. Subjects having pre-requisites are noted in the subject write up.

Within the 18 course requirements for a High School Graduation Diploma, no student may receive credit for two courses in the same subject at the same grade level. *For example, credit cannot be counted toward the 18 required credits from Mathematics 12 and Mathematics at Work 12.*

TRANSFER CREDITS

Students transferring into HERH from independent schools or from outside of Nova Scotia will receive credit for courses taken at these institutions on an individual basis. Not every course offered at these schools necessarily qualifies as a valid Nova Scotia credit for graduation.

TRANSCRIPTS

A transcript is an official school document listing your high school marks. Transcripts are required by colleges, universities, and other post-secondary institutions, and will include all marks from your high school courses, including failures, withdrawals, and repeat courses. One transcript will be included with your graduation certificate when you graduate. Current students should see Cathy in the office to request transcripts. Transcripts must be requested two days in advance.

COURSE IDENTIFICATION:

Courses are identified by subject title and grade level. For example: Math 11. In addition, each course is categorized as one of the following credit types:

- Graduation:** These courses are designed for students who wish to obtain a graduation diploma with a view to proceeding to employment or some selected area of post-secondary study.
- Open:** These courses are generally not designed to meet the requirements for university programs. "Although none of the open courses are designed to meet the specific requirements of any post-secondary institutions, individual courses may meet entrance requirements of some institutions."
- Academic:** These courses are designed for students who expect to enter college, university or other post-secondary institutions.
- Advanced:** These courses are designed to meet the needs of students who have demonstrated an exceptional degree of academic ability or achievement.

COURSE LOAD

It is recommended that all students in grade 10 enroll in a full course load of eight credits in order to earn as many credits as possible towards the eighteen required credits for graduation. Depending on the number of credits earned in previous years, students in grades 11 and 12 are recommended to enroll in 3 or 4 courses per semester.

There are a few courses that have a limitation on the number of students who can enroll. Due to these restrictions, students may have to make other selections. Students who may not be permitted to repeat these courses are as follows: 1) students who have already received credit for the course, 2) students who have failed any or all of these courses, 3) students who have withdrawn from these courses.

ATHLETICS

Nova Scotia School Athletic Federation (NSSAF) regulations require student athletes to be regular students in order to participate in NSSAF competition, any student who is registered as a regular student shall be eligible to compete. In semestered schools, a regular student is defined as one who is registered in a minimum of three courses in a semester at the school. Students enrolled in fewer than three courses are not considered full-time students and are ineligible for participation in NSSAF sanctioned athletics.

FREE BLOCK

Students wishing to register for a free block must have scheduled the necessary course requirements to graduate.

PROMOTION

Students are promoted in individual subjects by achieving a satisfactory level of performance. Students are assigned to a grade level based on the number of credits they have achieved.

Grade 12 students are those who are eligible to graduate if they successfully complete the courses for which they have registered.

Grade 11 students are those students who can graduate within two years by successfully completing the required credits. All other students are considered to be in grade ten.

RESOURCE

The Resource Centre is designed for students needing extra assistance in academic programs. The Resource Centre is a collaborative support system with teachers, parents and other personnel to support student success in learning.

Students requesting Resource assistance must be recommended by the school's Site-Base School Team, in collaboration with teachers and parents. The students who receive Resource support have been identified from previous school records and through recommendations from formal testing, previous school programs and/or from the Adaptations which have been in place. The Resource teachers work in collaboration with the school's Site-Base School Team to determine which students are priorities for support.

SCHOLARSHIPS AND BURSARIES

In recent years the HERH graduating students have received numerous scholarships and bursaries, in excess of \$100,000 from post-secondary institutions and local businesses and service clubs. Application forms for many local bursaries are available from Student Services.

ACADEMIC AWARDS

Hants East shall recognize and award outstanding achievement at the Graduation exercises in June. Grade 12 students who have qualified for the Honours, and Honours with Distinction shall be acknowledged.

Honours with Distinction Grades 10-12

Honours with Distinction are calculated based on the six highest academic or advanced courses. The student must have an average of 85 or greater with no mark below 80 in the courses used for this calculation. For their remaining courses, they will have no mark below 50. All courses must be taken in the current year.

Honours Grades 10-12

Honours are calculated based on the six highest courses. The student must have an average of 80 or greater with no mark below 75 in the courses used for this calculation. For their remaining courses, they will have no mark below 50. All courses must be taken in the current year.

Grade 9 Honours

Honours - must have an average of 80 or greater with no mark below 75

Honours with Distinction - must have an average of 85 or greater with no mark below 80

ACADEMIC MEDALS

The **Governor-General's Academic** Medal will be awarded to the graduating student who has attained the highest average, which will include **ALL grade 11 & 12** courses based on final marks. If two or more students attain the same aggregate, the Principal shall determine to whom the Governor General's Medal shall be awarded.

The **Queen Elizabeth II** Medal will be awarded to the graduating student who: a) has demonstrated a superior achievement in school studies in all three years of high school, b) has achieved an outstanding record in all aspects of school and community involvement.

The **Lieutenant Governor's Medal** will be awarded to one female and one male student in Grade 11 who has demonstrated qualities of leadership and service in the school and community, and has achieved commendable performance in the courses in which they are enrolled.

CAREER EXPLORATION PROGRAM (CEP)

The Career Exploration Program is a mixture of academic and shop courses which allows students to meet the graduation requirements while having hands on learning experiences through the shop and Co-op Education requirements.

Students in CEP are required to take the CEP courses indicated by the * or ** to remain in the Career Exploration Program. The CEP is being updated to add new courses and allow room for student choice in some courses.

Entry into CEP is through an application and interview process. Please see Mr. Casavechia (Chef), one of the Guidance counselors or Ms. Fraser to get an application package.

Students Entering CEP for 2017-2018		
Grade 10	Grade 11	Grade 12
*English 10 *Co-op 10A (½ credit) (Classroom & 2 week work term) *Food for Healthy Living 10 (½ credit) *Food Preparation Service 10 (½ credit) *Food Technology 10 (½ credit) *Science 10 *Skilled Trades 10 *Visual Arts 10 Math Essentials 10 or Math at Work 10 (based on Math Recommendations) Physical Education at grade 11 level (Fitness Leadership 11, Physically Active Living 11, Physical Education Martial Arts 11, or Yoga 11)	*English Communications 11 *Co-op 11 (2 two week work terms) *Canadian History 11 *Dining Guest Services 11 *Food Science 12 Math Essentials 11, or Math at Work 11 (based on Math Recommendations) Construction or Transportation Trades 11 (must have recommendation from Skilled Trades 10 – if not recommended, must select a different credit) Elective (student's choice)	*English Communications 12 *Global Geography 12 *Dining Guest Service 12 *Food Studies Hospitality 12 *Co-op 12 (2 two week work terms) 3 Electives (student's choice)

CEP designated courses () have a 15 person cap for shop classes and a 20 person cap for academic. If the section is not at capacity, non-CEP students can apply to take the course.

CORRESPONDENCE STUDIES

Public school correspondence courses follow the Nova Scotia Public School Program curriculum and use textbooks and other resource materials from the Authorized Learning Resources. Correspondence Study is independent study. The course work is marked by certified teachers who understand the special needs and circumstances of students who study at home. Courses are not taught.

Who can enroll?

You can enroll in a correspondence course if you:

1. live in Nova Scotia, are 16 years or older, and are not attending school.
2. live in Nova Scotia, are under 16 years old, and are legally excused from attending school. In this case, the principal at your last school must sign your application form, giving his or her approval.
3. are attending junior or senior high school (grades 7-12) and have the approval of your principal if:
 - the course is not offered in your school.
 - there are timetable conflicts.
 - you want to study a subject during the summer months, but the course is not offered then.
 - the principal recommends for some other reason that you take the course by correspondence.
 - you are a junior or senior high school student who previously attended school in Nova Scotia but are temporarily living out of the province or country (students living away from Canada should provide the name and address of a contact person in Nova Scotia)
 - you are an adult who normally lives in Nova Scotia, but you have been living out of the province or country for less than three years (applicants should provide the name and address of a contact person in Nova Scotia)
 - you are a non-resident of Nova Scotia interested in taking a secondary school level course for personal interest or credit

For additional information visit <http://csp.ednet.ns.ca/> or make an appointment to talk to a guidance counsellor.

NOVA SCOTIA VIRTUAL SCHOOL (NSVS)

The NSVS online courses are available for high school students registered in a Nova Scotia Public School. Submit registrations through the School Board Online Coordinator who will enter them in the NSVS Online Student Registration Portal. Note that a maximum of one online course is intended to be 1 of the 4 courses a student takes in each semester. For additional information visit <http://nsvs.ednet.ns.ca/> or make an appointment to talk to a guidance counselor.

PERSONAL DEVELOPMENT CREDITS

Personal development credits will be awarded for approved courses or programs of a high school standard that contribute to the Atlantic Essential Graduation Learnings. The Personal Development Credit Policy will acknowledge the value of student learning outside the public school system by recognizing for high school credit, achievements and credentials earned in the community.

Personal development credits will be reflected on a student's high school transcript thereby enhancing the transcript for the student.

- Personal Development Credits may be granted in grades 10, 11 and 12.
- Personal Development Credits may be half or full credits.
- Personal Development Credits will not duplicate the courses or programs that are part of Nova Scotia's Public School Program.
- Within the 18 credits a high school student requires for graduation, one elective credit can be a personal development credit.
- A personal development credit may not be used to fulfill a student's requirement for the 13 mandatory credits required for graduation.
- A student may have an unlimited number of personal development credits entered on their transcript, beyond the 18 required for graduation.
- Students who have earned a personal development credit from an approved provider prior to entering grade 10 may be awarded that credit any time after they enter grade 10.

For a list of approved providers and courses, as well as more information about Personal Development Credits, please visit the Department of Education website <https://pdc.ednet.ns.ca/>

COURSE DESCRIPTIONS

ARTS EDUCATION

Arts education, a critical component of a balanced program of studies, is fundamental to the aesthetic, physical, emotional, intellectual, and social growth of all students. It provides unique ways of knowing, doing, living, and belonging in the global community and plays a key role in the development of creativity and imagination.

Challenge for Credit in Arts Education

Background

The Department of Education and Culture recognizes that students may have already acquired the knowledge, skills and attitudes that an existing course seeks to develop. Challenge for credit provides a process for students to demonstrate that they have achieved learning outcomes as defined in the Public School Programs and the curriculum guide for a directly-related course.

Policy

1. All students currently enrolled in a public school in Nova Scotia may challenge for credit.
2. Challenge for credit is applicable only to designated Nova Scotia senior high school courses.
3. Students may challenge for any number of credits, but no more than two credits at each grade level for a total of six will count towards a High School Graduation Diploma.
4. Courses for which students have already received credit are not eligible for challenge for credit. Challenge for credit is not intended as a way to improve a course mark. Similarly, challenge for credit is not intended as a process by which a student can challenge a lower level course in the same subject at the same grade level as another course which the student has not completed successfully.
5. Successful challenges for credit will be given a mark.

Grade 10

DRAMA 10

(Academic, Fine Arts Credit)

This is an introductory course for students interested in drama and theatre arts. Drama 10 provides a foundation for future course work in drama and theatre. Through extensive work in improvisation, in both small and large groups, students gain confidence as they explore and communicate ideas, experiences, and feelings in a range of dramatic forms, such as dramatic movement and mime, dramatization, choral speech, choric drama, group drama, and Readers' Theatre.

The program consists of four strands, the first of which is "foundation" which is the platform upon which all good drama work begins. The remaining three strands are movement, speech, and theatre. Using foundational activities, improvisation, scripted plays, etc., the course is designed to develop the physical, emotional and intellectual resources of students.

MUSIC 10S

(Academic, Fine Arts Credit)

Music 10S (Strings) is an introductory course in music that focuses on the basics of music theory, technique and ensemble playing through the use of electric, acoustic and bass guitars. The course comprises the following components: Scales-major, minor, blues, chord structure and voicing, knowledge of fret board, basic music reading, ear training, ensemble playing, transposing, left and right hand techniques and performance. Learning experiences in this course offer students opportunities to explore a range of musical styles and genres. The course is designed to foster the learning of students of varying abilities, from beginners to more advanced players. Music Instrumental Strings 10 fulfills the Fine Arts requirement to graduate.

VISUAL ARTS 10

(Academic, Fine Arts Credit)

This course was developed within the framework of Foundations for the Atlantic Canada Arts Education Curriculum. It is "rooted" in creative exploration and problem-solving using a range of visual technologies and processes that include traditional media such as drawing, painting and sculpting, as well as options in contemporary media such as digital art, video and performance art. This course also includes studies in Art Appreciation and Art History.

Grade 11

DANCE 11

(Academic, Fine Art Credit **OR** Physical Education Credit)

As an academic credit, Dance 11 explores creative movement, the history of dance of different cultures, some social dances such as Latin and Swing, and involves a lot of participation in group choreography and presentation with class. The curriculum will embody the social skills of communication, co-operation and presentation as students learn the importance of good health and posture as it relates to them and to dance itself. No dance experience is required. Dance 11 does not emphasize any one style of dance, but rather learning to express through movement. Evaluation is comprised of testing, group choreography, self-evaluations, daily participation, a journal and a public presentation or exam.

DRAMA 11

(Academic, Fine Arts Credit)

Drama 11 builds on learning experiences provided in Drama 10 and focuses on the students' personal development. Beginning with foundation experiences to develop student confidence and capability, the course allows students to explore movement and speech and to combine these in a greater range of dramatic forms. Selected dramatic forms and skills are explored in depth for presentation and performance, including script interpretation and development, improvisation, stage movement and blocking and the elements of theatre production.

VISUAL ARTS 11

(Academic, Fine Arts Credit)

Art 11 continues the concentration on drawing and design and art history and further develops skills and abilities in other core components of painting, printmaking and sculpture.

Grade 12

ARTS ENTREPRENEURSHIP 12

(Academic, Elective Credit)

Please note, Arts Entrepreneurship is not a fine arts credit (Offered 2017-2018 & every 2nd year)

Arts Entrepreneurship 12 is exploratory in nature, focuses on project-based and portfolio learning, emphasizes inquiry, and focuses on 21st-century skills, including critical thinking, problem solving and risk taking, communication and collaboration, and creativity and innovation.

Arts Entrepreneurship 12 will provide learners with opportunities to:

- apply knowledge, skills, and interests fostered by learning in arts courses
- develop a sense of their own creative potential
- develop an entrepreneurial spirit
- become personally involved in their learning
- explore and make connections with local and global cultural sectors
- take inquiry beyond traditional classroom walls into the community and workplace
- deepen their understanding of Nova Scotia's vibrant cultural sector and its contribution to quality of life in communities
- provide skills and knowledge for future learning

Arts Entrepreneurship 12 has four modules:

- Module 1: The Culture Business (25–30 hours)
- Module 2: The Artist within Me (25–35 hours)
- Module 3: The Mini-venture (25–30 hours)
- Module 4: The Arts Entrepreneurship Project (30–40 hours)

DRAMA 12: THEATRE ARTS

(Academic, Fine Arts Credit)

(Offered 2018-2019 & every 2nd year)

The emphasis and focus in this course is on production. All students must write a play and do a play. Within the context of the class, students experience all elements of theatre from acting, directing, and producing to the many roles in the technical aspects including sound, lights, costumes, and props, as well as the business aspects of theatre. Due to the nature of Drama 12: Theatre Arts, before students consider enrolling in the course they should have a strong interest in theatre arts, and have a background in developmental drama. This is most effectively met through Drama 10, or Drama 11. Students who have not completed Drama 10 or Drama 11 and have a strong interest in this course require a recommendation from the course instructor.

In Drama 12: Theatre Arts, students experience the collaborative nature of theatre performance. Students will develop skills and attitudes necessary for working in a performing group, such as teamwork, leadership, adaptability, and support. They will also learn how all roles in theatre are interconnected.

*Drama 12: Theatre Arts is an academic course credit. Each student will be expected to **participate fully** in all activities and in any theatre / performance opportunities, some of which may occur outside of class time.*

VISUAL ARTS 12

(Academic, Fine Arts Credit)

Recommendation: Visual Arts 10 and Visual Arts 11, or other significant prior experience in art.

This course continues the exploration of how the visual arts play a role in everyday life. It is a critical exploration of issues relating to society, both past and present, and how they affect culture. Work will focus on the creation of both two and three dimensional works with an emphasis on mixed media. During the course each student will produce an original body of artwork, culminating in an end of semester piece for the class exhibition. Students in this course must be organized, independent workers interested in exploring their own art-making process, with prior experience working with various art media.

CO-OPERATIVE EDUCATION

Co-operative Education – What is it?

- In-school component
 - Career exploration, self-evaluation, and goal setting
 - Resumes, cover letters, and interview techniques
 - Workplace practices and workplace health and safety
- Co-op placement
 - 100 hours – can be completed during the school day, in the evenings, and/or on weekends

Why take co-op?

- Real world experience
- Learn about different careers so you can decide what is right for you
- Contacts in the working world

How do you sign up for co-op?

- You must be 16 or older in September
- **Select co-op 12 during online course selection**
- Co-op requires an application, community and teacher reference, plus an interview
 - Application forms are available from Ms. Farrell, guidance, and in the main office.
 - Completed application must be submitted by the last school day in March (March 31, 2017).
 - Interviews will be scheduled after applications have been received.

Grade 12

CO-OPERATIVE EDUCATION 12

(Academic)

Co-operative Education is a program that allows students to earn high school credits through completing an experiential work placement in the community. The course allows students to participate in educational and career planning that helps prepare the student for the next pathway in his or her life.

The course consists of an in-school component of a 25-hour minimum of pre-placement instruction, as well as a placement component of 100 hours. Classroom sessions are also held during and after the placement to provide opportunities for students to reflect on their learning. Students in this course must be self-motivated, mature and organized. They must have access to transportation to get to and from their work placement, and must go through an interview as part of the selection process for the program.

SKILLED TRADES 12 CO-OP

(Academic)

Pre-Requisite – Successful Completion of Skills Trades 10 AND Construction Trades 11 or Transportation Trades 11

Co-operative Education is a program that allows students to earn high school credits through completing an experiential work placement in the community. The course allows students to participate in educational and career planning that helps prepare the student for the next pathway in his or her life.

The Skilled Trades Co-operative 12 course is only available to students who have successfully completed both Skilled Trades 10 and either Construction Trades 11 or Transportation Trades 11. The course consists of an in-school component of a 25-hour minimum of pre-placement instruction, as well as a placement component of 100 hours. Classroom sessions are also held during and after the placement to provide opportunities for students to reflect on their learning. All placements are organized through the school, and students will do their community-based learning component with a provincially certified, red seal journey person. Students in this course must be self-motivated, mature and organized. They must have access to transportation to get to and from their work placement, and must go through an interview as part of the selection process for the program.

ENGLISH LANGUAGE ARTS - (ELA)

English Language Arts, at all levels, follows an outcomes-based structure. This means that all program content contributes toward student achievement of the General and Specific Outcomes defined by the Department of Education and Early Childhood Development as necessary for students to attain the Essential Graduation Learnings required for high school completion. Students enrolled in English and English Communications work toward achievement of the same grade level outcomes; however, the courses differ in pace, scope, emphases, and source texts.

Students are placed into English courses based upon the recommendation of their English teacher. If a student or parent/guardian takes issue with the English teacher's recommendation, the decision can be discussed with the classroom teacher and/or the English Department Head. Students may move from support/communications level English to academic if they have demonstrated the ability to successfully do so.

Grade 10

ENGLISH 10

(Academic)

English 10 offers learners an opportunity to consolidate their learning from their junior high years before they specialize in grade 11. The English 10 classroom offers abundant opportunities for students to read widely, to write frequently, all the while exploring a wide range of texts. English 10 also emphasizes proficiency in using oral language for a variety of purposes. **There is a Nova Scotia Exam at the end of this course.**

ENGLISH 10 PLUS

(Academic)

Full year course, 1 English credit + 1 elective credit

English 10 Plus offers learners an opportunity to consolidate their learning from their junior high years before they specialize in grade 11. The English 10 Plus classroom offers abundant opportunities for students to read widely, to write frequently, and to explore a wide range of print and visual texts. As English 10 Plus takes place over two semesters, this course provides students who have struggled in English Language Arts in the past the opportunity to further develop their English skills. This course is helpful to students who have difficulties with English, but hope to enter the academic English stream as it provides opportunities for remediation that aren't possible in English 10. **There is a Nova Scotia Exam at the end of this course.**

Grade 11

ADVANCED ENGLISH 11

(Advanced)

Pre-requisite: English 10; approval of English Department Head

Recommendation: Minimum of 80% in English 10

Advanced English courses are designed for students who read widely and rapidly. Students will be required to work independently and collaboratively on assignments designed to enrich their understanding of the role literature plays in society. Students will be required to reflect on their learning and be expected to express how they reached their understanding of various pieces of literature from a wide variety of genres.

ENGLISH 11

(Academic)

Pre-requisite: English 10, English 10 Plus, or English 10 Support

Recommendation: English 10

English 11 is intended for students whose goals include post-secondary study. While this course emphasizes literary texts, students are provided opportunities to select their own texts for independent study. Students are expected, through a variety of activities, to extend their knowledge base, thinking processes, learning strategies, self-awareness and insights.

ENGLISH COMMUNICATIONS 11

(Graduation)

Pre-requisite: English 10, English 10 plus, or English 10 Support

English/Communications courses are intended for students who may need additional support in their development as readers, writers, and language users. English/Communication courses are intended to prepare students for lifelong learning by engaging them in practical and interesting learning experiences closely related to their lives and to the world they will experience as adults. This course focuses on developing language skills necessary for the workplace.

Grade 12

ADVANCED ENGLISH 12

(Advanced)

Pre-requisite: English 11; approval of English Department Head

Recommendation: Minimum of 80% in English 11

Advanced English courses are designed for students who read widely and rapidly. Students will be required to work independently and collaboratively on assignments designed to enrich their understanding of the role literature plays in society. Students will be required to reflect on their learning and be expected to express how they reached their understanding of various pieces of literature from a wide variety of genres.

ENGLISH COMMUNICATIONS 12

(Graduation)

Pre-requisite: English 11 or English Communications 11

English/Communications courses are intended for students who may need additional support in their development as readers, writers, and language users. English/Communication courses are intended to prepare students for lifelong learning by engaging them in practical and interesting learning experiences closely related to their lives and to the world they will experience as adults. This course focuses on developing language skills necessary for the workplace.

ENGLISH 12

(Academic)

Pre-requisite: English 11 or English Communications 11

English 12 is intended for students whose goals include post-secondary study. While this course emphasizes literary texts, students are provided opportunities to select their own texts for independent study. Students are expected, through a variety of activities, to extend their knowledge base, thinking processes, learning strategies, self-awareness and insights. Students will be evaluated on reading comprehension, writing skills, and understanding of visual text.

FAMILY STUDIES

The central purpose of the family studies program is to enhance the quality of life for individuals and families. In this program, students are encouraged to identify, clarify, examine, and deal with significant concerns they encounter in their daily lives. They are given opportunities to make reasoned and sound judgments as they consider their decisions in terms of consequences to self, family, and society.

Grade 11

CHILD STUDIES 11

(Open)

This course will enable students to explore the meaning and implications of responsible parenthood and to help them apply the understanding of child development to the care and guidance of children at various ages and stages (prenatal development to early childhood development). Students will be required to take care of an electronic baby.

FRENCH SECOND LANGUAGE

CORE FRENCH

The core program is a continuation of the French courses followed by all students from grades 4 to 9. The aim of the Core French program is to develop the learner’s ability to communicate effectively in French. The options in Core French are limited to the following courses:

GRADE 10	GRADE 11	GRADE 12
Core French 10	Core French 11	Core French 12

CORE FRENCH 10

(Academic)

The core French 10 course is a continuation of grade 9. The philosophy of the course is based on communication. The activities are designed to promote, direct and stimulate the interaction among the students by drawing on their own experiences and prior knowledge. Active class participation is essential.

CORE FRENCH 11

(Academic)

This course places the accent on the communication aspects of the language and on learning through interaction. Major language functions, vocabulary and grammar elements will be regularly reintroduced and further developed.

CORE FRENCH 12

(Academic)

This course uses an integrated multi-dimensional approach to second language learning that emphasizes communication. The thematic units will integrate various literary genres (novels, short stories, poems, etc.) to develop speaking, listening, reading and writing.

INTEGRATED FRENCH

The integrated program develops a greater degree of competency in French than the Core French courses. Courses taught in French parallel those offered in the English Program. The students must begin this program in grade 7. Students in this program take a French language arts course and one other subject (usually a social studies course) taught in French. In order to be eligible for the integrated French participation certificate upon graduation, the students must be successful in the following courses:

GRADE 10	GRADE 11	GRADE 12
Integrated French 10 Art Dramatique 10	Integrated French 11 Histoire Canadienne 11	Integrated French 12 Géographie Planétaire 12

Grade 10

ART DRAMATIQUE 10 INT

(Académique)

Ce cours est le cours préliminaire pour les élèves qui s'intéressent dans le théâtre et les arts dramatiques. Le programme est divisé en quatre parties: la base, le mouvement, le discours et le théâtre. Ce cours vis à développer les habiletés physiques, émotives et intellectuelles des élèves, en faisant les activités de base, l'improvisation, les pièces, etc. Toutes les classes se déroulent en français.

**** See the English description under Drama 10 in the Fine Arts section.**

INTEGRATED FRENCH 10

(Académique)

Le cours de français intégré 10^e année est conçu de façon à répondre aux besoins des élèves dans les autres matières enseignées en français. Il est élaboré pour permettre aux élèves de perfectionner leurs habiletés de communication, de raffiner leurs habiletés de pensée et de résolution de problèmes et de développer une meilleure compréhension de leur propre culture ainsi que celles des autres, notamment celles des communautés francophones. Les élèves participent activement à des activités et à des projets variés qui se rapportent à leurs intérêts, à leurs besoins, à leur vécu et à leurs capacités. Ils doivent demander et fournir des renseignements, exprimer leurs pensées et leurs opinions, lire des textes variés, divertir et faire preuve de créativité.

INTEGRATED FRENCH 10 (Academic)

The Integrated French 10 course is designed to answer to the needs of the students in their other courses taught in French. They are developed to permit the students to perfect their communication abilities, to refine their problem solving skills and to develop a better understanding of their own culture, as well as other cultures, mainly those of francophone communities. The students will actively participate in activities and in various projects that draw on their interests, their needs, their experiences and their capabilities. They must question and provide information, express their thoughts and opinions, read various texts and demonstrate creativity.

Grade 11

INTEGRATED FRENCH 11

(Académique)

Le cours de français intégré 11^e année est une continuation de français intégré 10 et est conçu de façon à répondre aux besoins des élèves dans les autres matières enseignées en français. Il est élaboré pour permettre aux élèves de perfectionner leurs habiletés de communication, de raffiner leurs habiletés de pensée et de résolution de problèmes et de développer une meilleure compréhension de leur propre culture ainsi que celles des autres, notamment celles des communautés francophones. Les élèves participent activement à des activités et à des projets variés qui se rapportent à leurs intérêts, à leurs besoins, à leur vécu et à leurs capacités. Ils doivent demander et fournir des renseignements, exprimer leurs pensées et leurs opinions, lire des textes variés, divertir et faire preuve de créativité.

INTEGRATED FRENCH 11 (Academic)

The Integrated French 11 course is a continuation to Integrated French 10 and is designed to answer to the needs of the students in their other courses taught in French. They are developed to permit the students to perfect their communication abilities, to refine their problem solving skills and to develop a better understanding of their own culture, as well as other cultures, mainly those of francophone communities. The students will actively participate in activities and in various projects that draw on their interests, their needs, their experiences and their capabilities. They must question and provide information, express their thoughts and opinions, read various texts and demonstrate creativity.

HISTOIRE DU CANADA 11 IMM_INT

(Académique, Canadian History Credit)

Histoire du Canada est un cours qui examine cinq questions/concernes d'histoire du Canada. Ces questions sont la base de cinq des unités: La Mondialisation, Le Développement, La Souveraineté, Le Gouvernement et La Justice. La sixième unité est une étude indépendante qui permet aux élèves de faire une recherche historique. Ils doivent choisir un sujet et écrire un papier de recherche. Historiographie et la méthode historique sont essentielles dans ce cours pour examiner l'histoire du Canada dès les premiers gens de l'Amérique du Nord jusqu'au présent. ****See the English description for Canadian History in the Social Studies section.**

Grade 12

INTEGRATED FRENCH 12

(Académique)

Le cours de français intégré 12^e année est une continuation de français intégré 11 et est conçu de façon à répondre aux besoins des élèves dans les autres matières enseignées en français. Il est élaboré pour permettre aux élèves de perfectionner leurs habiletés de communication, de raffiner leurs habiletés de pensée et de résolution de problèmes et de développer une meilleure compréhension de leur propre culture ainsi que celles des autres, notamment celles des communautés francophones. Les élèves participent activement à des activités et à des projets variés qui se rapportent à leurs intérêts, à leurs besoins, à leur vécu et à leurs capacités. Ils doivent demander et fournir des renseignements, exprimer leurs pensées et leurs opinions, lire des textes variés, divertir et faire preuve de créativité.

INTEGRATED FRENCH 12 (Academic)

The Integrated French 12 course is a continuation to Integrated French 11 and is designed to answer to the needs of the students in their other courses taught in French. They are developed to permit the students to perfect their communication abilities, to refine their problem solving skills and to develop a better understanding of their own culture, as well as other cultures, mainly those of francophone communities. The students will actively participate in activities and in various projects that draw on their interests, their needs, their experiences and their capabilities. They must question and provide information, express their thoughts and opinions, read various texts and demonstrate creativity.

GEOGRAPHIE PLANÉTAIRE 12 INT

(Académique)

Le programme d'études de géographie planétaire a la particularité de traiter de problématiques et de défis actuels qui préoccupent l'ensemble de la planète. Cinq grands thèmes sont abordés : la population, le développement et l'inégalité, l'alimentation et l'eau, l'environnement et l'urbanisation. Chaque thème sera abordé en utilisant la méthode géographique qui implique la demande de questions, l'accumulation de faits, l'assimilation d'information et ses complexités et enfin le rendement de conclusion en forme de présentation orale et écrite. Ce cours demande une réflexion individuelle qui aboutit à une prise de position personnelle de l'apprenant face à sa responsabilité individuelle en tant que citoyen de la Terre mais aborde aussi la question et la responsabilisation collective face aux défis planétaires.

****See the English description under Global Geography in the Social Studies section.**

FRENCH IMMERSION

The immersion program is an alternate approach to learning French, Canada’s second official language. The goal of the program is to help students develop a high degree of proficiency in French. Subjects taught in French parallel those offered in the English program. Hants East Rural High offers a late French Immersion program, meaning that student must have enrolled in the program in grade 7. In order to be eligible for the French immersion certificate upon graduation, the students must be successful in the following courses:

Grade 10	Grade 11	Grade 12
Art Dramatique 10 Imm Francais Immersion 10 Sciences 10 Imm Biologie 11 Imm	Francais Immersion 11 Histoire Du Canada 11 Imm_Int	Biologie 12 Imm Francais Immersion 12 Geographie Planetaire 12 Imm
Notes: To ensure sufficient numbers to run each course, students must take the immersion course at the grade level indicated above.		

Grade 10

ART DRAMATIQUE 10 IMM

(Académique)

Ce cours est le cours préliminaire pour les élèves qui s'intéressent dans le théâtre et les arts dramatiques. Le programme est divisé en quatre parties: la base, le mouvement, le discours et le théâtre. Ce cours vis à développer les habiletés physiques, émotives et intellectuelles des élèves, en faisant les activités de base, l'improvisation, les pièces, etc. Toutes les classes se déroulent en français. ****See the English description under Drama 10 in the Fine Arts section.**

FRANÇAIS IMMERSION 10

(Académique)

Le cours de français immersion 10^e année est conçu de façon à répondre aux besoins des élèves dans les autres matières enseignées en français. Il est élaboré pour permettre aux élèves de perfectionner leurs habiletés de communication, de raffiner leurs habiletés de pensée et de résolution de problèmes et de développer une meilleure compréhension de leur propre culture ainsi que celles des autres, notamment celles des communautés francophones. Les élèves participent activement à des activités et à des projets variés qui se rapportent à leurs intérêts, à leurs besoins, à leur vécu et à leurs capacités. Ils doivent demander et fournir des renseignements, exprimer leurs pensées et leurs opinions, lire des textes variés, divertir et faire preuve de créativité.

FRENCH IMMERSION 10 (Academic)

The immersion French 10 course is designed to answer to the needs of the students in their other courses taught in French. They are developed to permit the students to perfect their communication abilities, to refine their problem solving skills and to develop a better understanding of their own culture, as well as other cultures, mainly those of francophone communities. The students will actively participate in activities and in various projects that draw on their interests, their needs, their experiences and their capabilities. They must question and provide information, express their thoughts and opinions, read various texts and demonstrate creativity.

SCIENCES 10 IMM

(Académique – Science Credit)

Les concepts et les notions scientifiques abordés dans ce cours sont des préalables pour entreprendre ultérieurement des cours de sciences. Ce cours intègre la biologie, la chimie, la physique et les sciences de la terre et de l'espace, selon une approche STSE, qui favorise le développement de la pensée critique et des habiletés langagière, sociales et médiatiques. ****See the English description under Science 10 in the Science section.**

Grade 11

BIOLOGIE 11 IMM

(Académique – Science Credit)

Ce cours comprend les 4 modules suivants :

Unité 1 – La matière et l'énergie pour la vie : Les cellules sont introduites comme les unités de base de la vie. Cette unité étudie le rôle des structures cellulaires dans l'échange de la matière et dans le flux d'énergie ainsi que l'impact de la technologie sur notre compréhension de la structure et les processus cellulaires.

Unité 2 – Le maintien et l'équilibre dynamique (Système digestif et la nutrition) : Tous les êtres vivants ont de la difficulté à maintenir un équilibre interne en réponse à la pression constante des phénomènes extérieurs. Cette unité étudie le rôle du système digestif et l'influence du comportement et de la nutrition dans la régulation de l'homéostasie.

Unité 3 – Le maintien et l'équilibre dynamique (Système circulatoire et le sang) : Tous les êtres vivants ont de la difficulté à maintenir un équilibre interne en réponse à la pression constante des phénomènes extérieurs. Cette unité étudie le rôle du système circulatoire et l'influence du comportement dans la régulation de l'homéostasie.

Unité 4 – La Biodiversité : La grande diversité des êtres vivants nécessite un système organisé pour leur classification et leur étude. Cette unité fournit une enquête approfondie et un aperçu de l'unité et de la diversité de la vie dans la biosphère. Cette unité étudie les 5 règnes de la classification en détail avec l'analyse (et dissection) d'un organisme représentatif de chaque.

BIOLOGIE AVANCÉ 11 IMM

(Avancé, Science Credit)

Le cours de biologie 11 avancé couvre les mêmes unités que le cours de biologie 11. Les étudiants seront demandés de faire des travaux indépendants et de résoudre des problèmes de niveaux plus avancés. ****See the English description under Biology 11 Advanced in the Science section.**

FRANÇAIS IMMERSION 11

(Académique)

Le cours de français immersion 11^e année est une continuation de français immersion 10 et est conçu de façon à répondre aux besoins des élèves dans les autres matières enseignées en français. Il est élaboré pour permettre aux élèves de perfectionner leurs habiletés de communication, de raffiner leurs habiletés de pensée et de résolution de problèmes et de développer une meilleure compréhension de leur propre culture ainsi que celles des autres, notamment celles des communautés francophones. Les élèves participent activement à des activités et à des projets variés qui se rapportent à leurs intérêts, à leurs besoins, à leur vécu et à leurs capacités. Ils doivent demander et fournir des renseignements, exprimer leurs pensées et leurs opinions, lire des textes variés, divertir et faire preuve de créativité.

FRENCH IMMERSION 11 (Academic)

The immersion French 11 course is a continuation of the immersion French 10 course and is designed to answer to the needs of the students in their other courses taught in French. They are developed to permit the students to perfect their communication abilities, to refine their problem solving skills and to develop a better understanding of their own culture, as well as other cultures, mainly those of francophone communities. The students will actively participate in activities and in various projects that draw on their interests, their needs, their experiences and their capabilities. They must question and provide information, express their thoughts and opinions, read various texts and demonstrate creativity.

HISTOIRE DU CANADA 11 IMM_INT

(Académique, Canadian History Credit)

Histoire du Canada est un cours qui examine cinq questions/concernes de histoire du Canada. Ces questions sont la base de cinq des unités: La Mondialisation, Le Développement, La Souveraineté, Le Gouvernement et La Justice. La sixième unité est une étude indépendante qui permet aux élèves de faire une recherche historique. Ils doivent choisir un sujet et écrire un papier de recherche. Historiographie et la méthode historique sont essentielles dans ce cours pour examiner histoire du Canada dès les premiers gens de l'Amérique du Nord jusqu'au présent. ****See the English description for Canadian History in the Social Studies section.**

Grade 12

BIOLOGIE 12 IMM

(Académique, Science Credit)

Ce cours comprend les 4 modules suivants :

Unité 1 – Les systèmes de régulation chimique et électrochimique : Tous les organismes vivants ont de la difficulté à maintenir un équilibre interne en réponse à la pression constante de phénomènes extérieurs. Cette unité étudie le rôle des systèmes chimiques et électrochimiques dans la régulation de l'homéostasie. L'impact de la maladie, de la technologie médicale et de la drogue sera également étudié.

Unité 2 – La reproduction et le développement : La reproduction est essentiel pour la continuité de l'espèce. Cette unité étudie le processus de la reproduction aux niveaux cellulaire et multicellulaire. L'influence des technologies de reproduction sera également étudiée.

Unité 3 – La continuité génétique: Une grande partie de la structure et la fonction des organismes est déterminée par leur matériel génétique. Cette unité étudie la structure et la réplication de l'ADN, sa transcription à l'ARN, et sa translation en protéines. L'unité étudie la façon dont les gènes se passent d'une génération à l'autre et fournit une introduction à la génétique de base. Les effets des mutations, les maladies génétiques, et le génie génétique seront également explorés.

Unité 4 – L'évolution : La science tente de fournir une explication de l'origine et de l'évolution de la vie sur terre. Cette unité étudie des preuves qui appuient la théorie de l'évolution et propose une analyse des mécanismes de l'évolution.

BIOLOGIE AVANCÉ 12 IMM

(Avancé, Science Credit)

Le cours de biologie 12 avancé couvre les mêmes unités que le cours de biologie 12. Les étudiants seront demandés de faire des travaux indépendants et de résoudre des problèmes de niveaux plus avancés. ****See the English description under Biology 12 Advanced in the Science section.**

FRANÇAIS IMMERSION 12

(Académique)

Le cours de français immersion 12^e année est une continuation de français immersion 11 et est conçu de façon à répondre aux besoins des élèves dans les autres matières enseignées en français. Il est élaboré pour permettre aux élèves de perfectionner leurs habiletés de communication, de raffiner leurs habiletés de pensée et de résolution de problèmes et de développer une meilleure compréhension de leur propre culture ainsi que celles des autres, notamment celles des communautés francophones. Les élèves participent activement à des activités et à des projets variés qui se rapportent à leurs intérêts, à leurs besoins, à leur vécu et à leurs capacités. Ils doivent demander et fournir des renseignements, exprimer leurs pensées et leurs opinions, lire des textes variés, divertir et faire preuve de créativité.

FRENCH IMMERSION 12

The immersion French 12 course is a continuation to the immersion French 11 course and is designed to answer to the needs of the students in their other courses taught in French. They are developed to permit the students to perfect their communication abilities, to refine their problem solving skills and to develop a better understanding of their own culture, as well as other cultures, mainly those of francophone communities. The students will actively participate in activities and in various projects that draw on their interests, their needs, their experiences and their capabilities. They must question and provide information, express their thoughts and opinions, read various texts and demonstrate creativity.

GEOGRAPHIE PLANÉTAIRE 12 IMM

(Académique – Global Studies Credit)

Le programme d'études de géographie planétaire a la particularité de traiter de problématiques et de défis actuels qui préoccupent l'ensemble de la planète. Cinq grands thèmes sont abordés : la population, le développement et l'inégalité, l'alimentation et l'eau, l'environnement et l'urbanisation. Chaque thème sera abordé en utilisant la méthode géographique qui implique la demande de questions, l'accumulation de faits, l'assimilation d'information et ses complexités et enfin le rendement de conclusion en forme de présentation orale et écrite. Ce cours demande une réflexion individuelle qui aboutit à une prise de position personnelle de l'apprenant face à sa responsabilité individuelle en tant que citoyen de la Terre mais aborde aussi la question et la responsabilisation collective face aux défis planétaires.

****See the English description under Global Geography in the Social Studies section.**

MATHEMATICS

The following chart shows some typical routes for students entering grade 10 in 2017-2018 depending on initial competency and post-secondary plans.

The Department of Education recommends "that the study of mathematics revolve around a core curriculum, differentiated by the level of investigation of each topic and the nature of the applications".

It is recognized that the needs, abilities and the motivation of students will vary, and that students will demonstrate different levels of performance. Therefore, three levels of mathematics (graduation, academic and advanced) have been developed to meet the needs of most students. The significant difference among the levels will be with respect to the level of difficulty, the rate at which the curriculum is delivered and the individual expectations in regard to each topic.

Graduation level courses are characterized by a greater focus on concrete activities, models and applications, with less emphasis given to symbolic and abstract mathematics. Less time will be spent on complex exercises and connections with advanced ideas. Our graduation level courses include Mathematics 10 Essentials, Mathematics 11 Essentials, Mathematics at Work 10, 11, and 12.

Academic level courses are offered as "university-preparatory" for students who wish to pursue post-secondary studies (including programs such as Arts and Education) where there is a Math 12 Academic "pre-requisite". Students should be relatively successful in previous math courses (above 70%) and enjoy the problem-solving nature of mathematics at an

academic level. Our academic courses include Mathematics 10, Mathematics 11 and Mathematics 12.

Advanced The Department of Education recommends that students taking advanced mathematics courses will typically have been very successful in prior mathematics courses and will remain successful because of their level of understanding of their previous experiences, their willingness and their ability to work in the abstract and their work ethic. Advanced mathematics courses will typically include:

- More challenging open-ended problems at a higher level of abstract thinking.
- More problems that involve many concepts and skills in one context.
- Greater use of and need for algebraic manipulation
- More opportunity for logic and deductive reasoning
- More opportunity for mathematical reading and writing and independent research.

Students need to complete a minimum of two mathematics courses at different grade levels to graduate from high school in Nova Scotia. Post-secondary institutions (universities, colleges, professional and private schools) have different minimum requirements for entrance into their programs. It is important to check the institutions calendar or website for specific requirements. Please consult our guidance counselors if you require clarification or assistance when selecting your courses.

GRADE 10

MATHEMATICS ESSENTIALS 10

(Graduation)

Pre - Requisite: Recommendation from Grade 9 Mathematics teacher.

This course will be presented as a 110-hour course over one semester. Mathematics Essentials 10 is an introductory high school mathematics course designed for students who do not intend to pursue post-secondary study or who plan to enter programs that do not have any mathematics pre-requisites.

Mathematics Essentials courses are designed to provide students with the development of the skills and understandings required in the workplace, as well as those required for everyday life at home and in the community. Students will become better equipped to deal with mathematics in the real world and will become more confident in their mathematical abilities.

The typical pathway for students who successfully complete Mathematics Essentials 10 is Mathematics Essentials 11. These two courses will provide successful students with the two mathematics credits required for graduation.

Students in Mathematics Essentials 10 will explore the following topics: mental math, working and earning, deductions and expenses, paying taxes, making purchases, buying decisions, probability, measuring and estimating, transformation and design, and buying a car.

MATHEMATICS AT WORK 10

(Graduation)

Pre - Requisite: Recommendation from Grade 9 Mathematics teacher.

This course will be presented as a 110-hour course over one semester. Mathematics at Work 10 is an introductory high school mathematics course which demonstrates the application and importance of key math skills.

The new Mathematics at Work courses are designed to provide students with the mathematical understandings and critical-thinking skills identified for direct entry into the work force or for entry into programs of study that do not require academic mathematics.

The typical pathway for students who successfully complete Mathematics at Work 10 is Mathematics at Work 11 followed by Mathematics at Work 12. Some students who successfully complete Mathematics at Work 10 may choose to take Mathematics Essentials 11.

Students in Mathematics at Work 10 will explore the following topics: measurement, area, Pythagorean Theorem, trigonometry, geometry, unit pricing and currency exchange, income, and basic algebra.

There is a provincial exam at the end of this course.

MATHEMATICS 10

(Academic)

Full year, 1 mathematics credit + 1 other (math/sci/tech)

Pre-requisite: Successful completion of Grade 9 Mathematics and recommendation from the Grade 9 Mathematics teacher.

This course will be presented as a 220-hour course (two academic credits). This will mean that students will have mathematics class every day for their grade 10 year. Mathematics 10 is an academic high school mathematics course which is a pre-requisite for all other academic and advanced mathematics courses. Students who select Mathematics 10 should have a solid understanding of mathematics from their junior high years. This means that students would have demonstrated satisfactory achievement of learning outcomes in grade 9 mathematics.

All students following the academic or advanced pathway will need to take Mathematics 10 followed by Mathematics 11. These courses are to be taken consecutively, not concurrently. There are two typical pathways for students who successfully complete Mathematics 10:

- For those students intending to follow the **academic** pathway, Mathematics 10 will be followed by Mathematics 11 and then Mathematics 12. (Mathematics 11 and Mathematics 12 are designed to provide students with the mathematical understandings and critical-thinking skills identified for post-secondary studies in programs that do not require the study of theoretical calculus).
- For those students intending to follow the **advanced** pathway, Mathematics 10 will be followed by Mathematics 11, then Pre-Calculus 11 and Pre-Calculus 12.

Students in Mathematics 10 will explore the following topics: measurement systems, surface area and volume, right triangle trigonometry, exponents and radicals, polynomials, linear relations and functions, linear equations and graphs, solving systems of equations, and financial mathematics.

There is a provincial exam at the end of this course.

GRADE 11

MATH ESSENTIALS 11

(Graduation)

Pre-Requisite: Successful completion of Mathematics Essentials 10 or Mathematics at Work 10.

This course will be presented as a 110-hour course over one semester. Mathematics Essentials 11 is designed for students who either do not intend to pursue post-secondary study or plan to enter post-secondary programs that do not have any mathematics pre-requisites. The Mathematics Essentials pathway is designed to provide students with the development of the skills and understandings required in the workplace, as well as those required for everyday life at home and in the community. Students will become better equipped to deal with mathematics in their everyday life and will become more confident in their mathematical abilities.

Students in Mathematics Essentials 11 will explore the following topics: mental mathematics; collecting, organizing and graphing data; borrowing money; renting or buying; household budgets; investing money; measuring; and 2-D and 3-D design, mathematics in content areas such as science and social studies.

This course and Mathematics Essentials 10 satisfy the graduation requirement of having two mathematics credits.

MATHEMATICS AT WORK 11

(Graduation)

Pre-Requisite: Successful completion of Mathematics 10 or Mathematics at Work 10.

This course will be presented as a 110-hour course over one semester. Mathematics at Work 11 demonstrates the application and importance of key mathematical skills.

The typical pathway for students who successfully complete Mathematics at Work 11 is Mathematics at Work 12. The Mathematics at Work pathway is designed to provide students with the mathematical understandings and critical-thinking skills identified for direct entry into the work force or for entry into programs of study that do not require academic mathematics.

Students in Mathematics at Work 11 will explore the following topics: measurement systems volume, 2-D and 3-D geometry, scale, exploded diagrams, numerical reasoning, personal budgets, compound interest, financial institution services, and formula manipulation for various contexts.

EXTENDED MATHEMATICS 11

(Academic)

Full year, 1 mathematics credit + 1 other (math/sci/tech)

Prerequisite: Successful completion of Mathematics 10.

Extended Mathematics 11 is a 220-hour course that is scheduled over the duration of the school year, September to June. Students who successfully complete this course will receive one grade 11 academic mathematics credit and one grade 11 technology credit.

Extended Mathematics 11 is an academic high school mathematics course. Students who select Extended Mathematics 11 will complete the curriculum outcomes for the semestered Mathematics 11 course and additional concepts in Statistics and Data Analytics. They will have extra time to explore concepts using a variety of learning experiences and use technology to enhance their learning.

The typical pathway for students who successfully complete Extended Mathematics 11 will be to take Mathematics 12. Alternatively, students who successfully complete Extended Mathematics 11 may choose to select either Mathematics at Work 12 or Mathematics Essentials 12. *While not the typical pathway, Extended Mathematics 11 can also be used as a pre-requisite for Pre-calculus 11. These courses are to be taken consecutively, not concurrently.**

Students in Extended Mathematics 11 will explore the following topics: linear programming, applications of rates, scale diagrams and factors, inductive and deductive reasoning, an introduction to proof, cosine law, sine law, spatial reasoning, statistics, systems of linear inequalities, and quadratic functions, inference making from statistical summaries, analyzing and presenting data and how to extract meaning from data.

**Note: Students who complete Extended Mathematics 11 and then decide to take Pre-calculus 11 followed by Pre-calculus 12 should contact their guidance counselor for scheduling options.*

MATHEMATICS 11

(Academic)

Pre-Requisite: Successful completion of Mathematics 10.

This course will be presented as a 110-hour course over one semester. Mathematics 11 is an academic high school mathematics course. Students who select Mathematics 11 should have a solid understanding of the Mathematics 10 curriculum. Mathematics 11 is a prerequisite for Pre-calculus 11. These courses are to be taken consecutively, not concurrently.

There are two typical pathways for students who successfully complete Mathematics 11:

- For those students intending to follow the academic pathway, Mathematics 11 will be followed by Mathematics 12. Mathematics 11 and Mathematics 12 are designed to provide students with the mathematical understandings and critical-thinking skills identified for post-secondary studies in programs that require an academic or Pre-calculus mathematics credit.
- For those students intending to follow the advanced pathway, Mathematics 11 will be followed by Pre-calculus 11, and then Pre-calculus 12.

Students in Mathematics 11 will explore the following topics: applications of rates, scale diagrams and factors, inductive and deductive reasoning, an introduction to proof, cosine law, sine law, spatial reasoning, statistics, systems of linear inequalities, and quadratic functions.

PRE-CALCULUS 11

(Advanced)

Prerequisite: Successful completion of Mathematics 11.

This course will be presented as a 110-hour course.

Pre-calculus 11 is an advanced high school mathematics course. Students who select Pre-calculus 11 should have a solid understanding of the Mathematics 11 curriculum. Pre-calculus 11 is a prerequisite for Pre-calculus 12. These courses are to be taken consecutively, not concurrently. The typical pathway for students who successfully complete Pre-calculus 11 is Pre-calculus 12. Courses in the Pre-calculus pathway are designed to provide students with the mathematical understandings and critical-thinking skills identified for post-secondary studies in programs that require the study of theoretical calculus. Some students who successfully complete Pre-calculus 11 may choose to take Mathematics 12.

Students in Pre-calculus 11 will explore the following topics: absolute value, radical expressions and equations, rational expressions and equations, angles in standard position, analyze and solve quadratic equations, linear and quadratic equations and inequalities in two variables, arithmetic and geometric sequences, and reciprocals of linear and quadratic functions.

GRADE 12

MATHEMATICS AT WORK 12

(Graduation)

Pre-Requisite: Successful completion of Mathematics at Work 11 or Mathematics 11. The prerequisite for Mathematics at Work 12 must be taken and successfully completed prior to starting Mathematics at Work 12.

This course will be presented as a 110-hour course over one semester.

The Mathematics at Work pathway is designed to provide students with the mathematical understandings and critical-thinking skills identified for direct entry into the work force or for entry into programs of study that do not require academic mathematics.

Students in Mathematics at Work 12 will study the following topics: measurement and probability, measures of central tendency, scatterplots, linear relationships, owning and operating a vehicle, properties of polygons, transformations and trigonometry.

MATHEMATICS 12

(Academic)

Pre-Requisite: Successful completion of Mathematics 11 or Pre-calculus 11. The prerequisite for Mathematics 12 must be taken and successfully completed prior to starting Mathematics 12.

This course will be presented as a 110-hour course over one semester.

Mathematics 12 is designed to provide students with the mathematical understandings and critical-thinking skills identified for post-secondary studies in programs that do not require the study of theoretical calculus.

Students who select Mathematics 12 should have a solid understanding of the Mathematics 11 curriculum. Students in Mathematics 12 will study the following topics: borrowing money, investing money, set theory, logical reasoning, counting methods, probability, polynomial functions, exponential and logarithmic functions, and sinusoidal functions.

PRE-CALCULUS MATHEMATICS 12

(Advanced)

Pre-Requisite: Successful completion of Pre-Calculus Mathematics 11. Pre-calculus 11 must be taken and successfully completed prior to starting Pre-calculus 12.

This course will be presented as a 110-hour course over one semester.

The Pre-calculus pathway is designed to provide students with the mathematical understandings and critical-thinking skills identified for post-secondary studies in programs that require the study of theoretical calculus. Students who select Pre-calculus 12 should have a solid understanding of the Pre-calculus 11 curriculum.

Students in Pre-calculus 12 will study the following topics: transformations, radical functions, polynomial functions, trigonometry, exponential and logarithmic functions, rational functions, function operations, permutations, combinations and the binomial theorem.

CALCULUS 12

(Advanced)

Pre-Requisite: Successful completion of Pre-Calculus Mathematics 12.

This course will be presented as a 110-hour course over one semester.

This course includes the following topics: the concept of a limit, simple derivatives, properties of derivatives, derivatives of trigonometric, exponential and logarithmic functions, applications of derivatives - tangents, rates of change, motion, curve sketching, anti-derivatives, differential equations and applications of anti-derivatives.

PHYSICAL EDUCATION

The primary aim of the physical education program is to help students participate in and develop a physically active lifestyle that will enable them to experience a more enjoyable quality of life physically, mentally, emotionally, and socially. If students are to be involved in physical activity on a lifelong basis, they must be equipped with the skills, knowledge, and attitudes that will enable them to enjoy and benefit from these activities. Students must successfully complete at least one physical education credit to meet graduation requirements.

Grade 10

PHYSICAL EDUCATION 10

(Open, Physical Education Credit)

This course will provide students with a variety of fitness and sport experiences to enhance their understanding of personal fitness and growth. Physical Education 10 includes some theory components, coupled with predominantly active experiences whereby students will have the opportunity to participate in a variety of indoor and outdoor fitness, sport and recreational experiences. The emphasis of this curriculum is to provide students with experiences that require them to take and reflect on their personal responsibility for active, healthy living now and throughout life. The course is divided into (4) modules: Outdoor pursuits, Exercise Science, Personal Fitness, and Leadership. This course meets the physical education requirement for high school graduation.

FITNESS LEADERSHIP 11

(Academic, Physical Education Credit)

This course will be learning about fitness in a fun and comfortable environment. It will have 2 blocks in the fitness room, 1 in the classroom, and 1 in the gym per cycle. Fitness Leadership 11 will examine the principles of exercise, healthy fitness habits, principles of training, and good leadership practices when leading physical activity. There will also be a focus on the basic anatomy and physiology of exercise.

Aside from the theoretical components of exercise, students will be getting practical, hands-on experience planning and delivering fitness programs for large groups, small groups, and individuals. Examples of projects include planning personal training programs for a "client", leading a group fitness class, and delivering a physical activity program for younger children. There is also completion of a first aid course.

Grade 11

DANCE 11

(Academic, Physical Education Credit or Fine Arts Credit)

As an academic credit, Dance 11 explores creative movement, the history of dance of different cultures, some social dances such as Latin and Swing, and involves a lot of participation in group choreography and presentation with class. The curriculum will embody the social skills of communication, cooperation and presentation as students learn the importance of good health and posture as it relates to them and to dance itself. No dance experience is required. Dance 11 does not emphasize any one style of dance, but rather learning to express through movement. Dance 11 fulfills the Fine Arts requirement for High School Completion, and is available to students registered in their first year of High School. Evaluation is comprised of testing, group choreography, self-evaluations, daily participation, a journal and a public presentation or exam. Guest presenters will be utilized as part of the course.

PHYSICAL EDUCATION – MARTIAL ARTS 11

(Open, Physical Education Credit)

Physical Education: Martial Arts is a course that offers a balanced program of studies. The physical components of the course focus on building a strong and active body, and the development of self-defense techniques based on traditional karate. A series of complementary units will focus on the more traditional academic approach to exploring Asian culture. This course provides students with the opportunity to develop life-long positive personal qualities such as self-discipline, commitment to promoting personal fitness, control of spirit and self-confidence by tapping into their personal interests. No previous martial arts experience is necessary for this course. This course meets the physical education requirement for high school completion.

PHYSICALLY ACTIVE LIVING 11

(Open, Physical Education Credit)

This course will engage students in a variety of healthful, physically active experiences and to have sound knowledge of the health benefits of these activities. The course has a theoretical base upon which the activity is built. Students will be expected to participate in physical activities that will increase personal fitness levels and make informed decisions about the benefits of various activities in high school and in adult life. They will understand the importance of personal fitness, fair play, and healthy life style habits. There is a balance between theory and activity among the six strands of the course: active living, fair and safe play, personal fitness, nutrition, consumer issues, and stress.

YOGA 11

(Academic, Physical Education Credit)

Yoga 11 will introduce students to various styles and characteristics of yoga. It is an expectation that students will develop a lifelong personal practice of yoga for personal fitness and recreation. Students will be participating in a variety of activities that will include both physical practice and classroom theory. The physical practice of yoga will include learning, developing, and practicing skills that involve strength, flexibility, endurance, balance, poise, regulation of energy, and mental focus, all of which can be applied to other physical activities. Classroom sessions educate students about the relationship between nutrition and fitness, the history and philosophy of yoga including values of non-violence, ethics, honesty and respect in the context of challenging physical activity.

Grade 12

EXERCISE SCIENCE 12

(Academic, Physical Education Credit)

This course focuses on the study of human movement and of systems, factors, and principles involved in human development. Students will learn about the effects of physical activity on health and performance, the evolution of physical activity, and the factors that influence the individual's participation in physical activity. The course prepares students for university programs in physical education, kinesiology, recreation, sports administration, and health sciences.

PHYSICAL EDUCATION 12

(Open, Physical Education Credit)

Physical Education 12 will provide students with a variety of fitness and sport experiences to enhance their understanding of personal fitness and growth. Physical Education 12 is comprised of theory components, coupled with active experiences whereby students will have the opportunity to participate in a variety of indoor/outdoor fitness, sport and recreational experiences.

PHYSICAL EDUCATION LEADERSHIP 12

(Academic, Physical Education Credit)

Physical Education Leadership 12 will provide students with an opportunity to participate in a variety of learning experiences specific to the development of leadership skills. The leadership component includes categories of sport science, community recreation and sports, intramurals, sport experience, personal fitness, outdoor pursuit and recreational activities, sport safety, and officiating. A theory component will involve topics related to leadership in sport (scheduling, officiating, group dynamics, decision-making, communication, teaching, tournament organization, coaching, and current issues in sport and leadership styles). The fitness component will place emphasis on the development of overall physical fitness throughout the year. Students should come prepared on a daily basis for both activity and theory. Gym clothes are mandatory.

SCIENCE

Students must successfully complete at least two science credits to meet graduation requirements. One of the science credits must come from Science 10, Biology, Chemistry, and Physics. The second science credit can come from any approved science course.

Grade 10

SCIENCE 10

(Academic, Science Credit)

Science 10 is composed of four units: Biology, Chemistry, Earth Science, and Physics. Each unit explores topics which are fundamental to further studies of science in Grades 11 and 12 (particularly Chemistry and Physics). This course is designed to encourage students to combine scientific knowledge and critical thinking to develop decision-making and problem-solving abilities. This course is the recommended prerequisite for Biology 11, Chemistry 11 and Physics 11.

Grade 11

BIOLOGY 11

(Academic, Science Credit)

Recommended Prerequisite: Science 10

This course emphasizes the science themes: change, diversity, energy, equilibrium, matter, and systems. These themes allow teachers to show students the connections within the science program and how individual sections of the program relate to the big ideas in science. In addition to developing a solid understanding of fundamental science concepts and principles, Biology 11 has the goal of educating students about the nature of science and technology and the interaction between biology and technology. Students are made aware of the impact of biology and associated technology on society and the limitations of the biological sciences, science in general, and technology in solving societal problems. Biology 11 consists of four units of study: Bio-diversity, Energy Flow and Cellular Matter, Energy and Matter Exchanged by Humans and Other Organisms, Energy and Matter Exchange in Ecosystems

ADVANCED BIOLOGY 11

(Advanced, Science Credit)

Recommended Prerequisite:

Successful completion of Science 10

Advanced Biology 11 covers the same topics as Biology 11, but moves at a faster pace to allow a more in-depth study of the topics covered and allow time for extended problem solving. The class work, labs and evaluations will be more complex and demanding. An independent experimental research project is a requirement of the course.

CHEMISTRY 11

(Academic, Science Credit)

Prerequisite: Science 10

Chemistry 11 consists of three units of study:

Stoichiometry: Students will begin with a review the concepts learned in Science 9 & 10 - nomenclature and formula writing, writing balanced chemical reactions and reaction prediction. This unit introduces the problem solving aspect of chemistry, including moles, significant figures, measurements, and calculations. This involves single, and multi-step problem solving. Strong math skills are important.

From Structures to Properties: Students will review the concepts learned in Science 9 & 10 - atomic structure and the periodic table. Students will expand on this knowledge, including the quantum mechanical model of the atom and the theories of ionic and covalent bonding. This unit focuses on bonding and the theoretical foundation of chemistry.

Organic Chemistry: Organic chemistry is the study of molecular compounds of carbon. Students will investigate the classification of organic molecules, nomenclature, the type of bonding and the atoms present, as well as the reactions of organic compounds. This unit will reinforce the concepts of valence electrons, bonding, and intermolecular and intramolecular forces covered in the previous unit.

ADVANCED CHEMISTRY 11

(Advanced, Science Credit)

Recommended Prerequisite: Successful completion of Science 10 and Math 10

Advanced Chemistry 11 covers the same topics as Chemistry 11, but moves at a faster pace to allow a more in-depth study of the topics covered and to allow time for extended problem solving. Students need strong problem solving skills and need to be able to work independently. An independent research project is a requirement of the course.

HUMAN BIOLOGY 11

(Graduation, Science Credit)

This course is credit that counts as a second science credit for high school graduation. The major systems of the human body will be covered in this course using an issues based or society and technology point of view. Lab work, projects, individual presentations, group activities and case study examples will be the main learning strategies in the course. This course is designed so that students gain an appreciation for and an understanding of the importance of various body functions.

Note: It is not recommended that students take both Biology 11 and Human Biology 11. Human Biology 11 does not meet the recommended prerequisite for Biology 12

OCEANS 11

(Academic, Science Credit)

This course offers students the opportunity to investigate the various aspects of the ocean and related issues. Oceans 11 is a unique look into physical, chemical, geological, and biological factors and their relationships to one another. Topics of interest include fishing practices, navigation, fisheries management, tidal power, off-shore oil exploration, aquaculture, and conservation. Laboratory and field work are an integral part of the course offering hands-on investigation.

PHYSICS 11

(Academic, Science Credit)

Prerequisite: Science 10 and Math 10

Physics is the study of energy and matter. Core topics of the program will include kinematics (the study of motion), dynamics (the causes of motion), momentum, energy, and waves (including mechanical, sound, and light waves). Students will be expected to express themselves verbally and in writing, demonstrate sound logic and reasoning ability, and to have a firm grasp on mathematical concepts and relationships.

ADVANCED PHYSICS 11

(Advanced, Science Credit)

Prerequisite: Successful completion of Science 10 and Math 10

Advanced Physics 11 will cover the same core topics as Physics 11, but with a greater depth and at a faster pace. The topics of elementary particles and astrophysics will also be introduced. Problem solving will require a higher degree of mathematical expertise. In addition, the student textbook, labs, and evaluations will be more complex and demanding. An independent experimental research project is requirement of the course.

Grade 12

BIOLOGY 12

(Academic, Science Credit)

Recommended Prerequisite: Biology 11

Biology 12 consists of four units:

Systems Regulating Change in Humans and Other Organisms:

This unit introduces cells as specialized biochemical units that process various organic compounds. The human organism is used as the principal model in a detailed examination of the chemical and electrical systems that regulate change to maintain equilibrium.

Reproduction & Development uses: The human organism as the principal model for a detailed examination of how genetic, hormonal, and environmental factors cause change during reproduction and the development of organisms.

Chromosomes, Genes and DNA: This unit explores chromosomes, genes and DNA and their responsibility for diversity and change in living systems. The topic is examined in detail over a wide range of organizational levels.

Change in Populations, Communities, and Species: This unit explores equilibrium and change in population gene pools and the consequences of such change at the community, systems, and species level. The Theory of Evolution is included in this unit.

ADVANCED BIOLOGY 12

(Advanced, Science Credit)

Recommended Prerequisite: Successful completion of Advanced Biology 11 or Biology 11

Advanced Biology 12 covers the same core topics as in Biology 12, but moves at a faster pace. This course offers more in-depth study of certain topics, a greater number of labs, and evaluation will be more varied and demanding. An independent experimental research project will be a requirement of the course.

CHEMISTRY 12

(Academic, Science Credit)

Prerequisite: Chemistry 11

Successful completion of Chemistry 11 is necessary, as Chemistry 12 continues to build on the concepts and problem-solving skills covered in the Grade 11 course. The first unit is Thermochemistry, which involves the study of energy and heat transfer. The second unit involves solutions, equilibrium and reaction rate. The third unit investigates the properties of acids, and bases, while the final unit studies the concepts of electrochemistry. Strong problem-solving skills are necessary for success in Chemistry 12.

ADVANCED CHEMISTRY 12

(Advanced, Science Credit)

Recommended Prerequisite: Successful completion of Advanced Chemistry 11 or Chemistry 11; Advanced Mathematics 11

Chemistry 12 covers the same topics as Chemistry 11, but the topics are covered in more depth, involving higher-level problem solving. In order to cover the topics in more depth, the course moves at a faster pace, requiring that students be able to work efficiently. This course is recommended for students with very strong problem solving and analytical skills. An independent research project is requirement of the course.

FOOD SCIENCE 12

(Academic, Science Credit)

Food Science 12 is an academic credit and is eligible to meet the second science graduation requirement. Food Science 12 consists of four modules: Food Constituents, Preservation Factors, Food Quality and Commodities, and Food Packaging. Students will investigate the constituents of food, its chemical and physical properties, what causes food to deteriorate and how to control it, and food preservation techniques. They will also study how food quality is controlled and assured as well as learning about food product development and packaging design.

PHYSICS 12

(Academic, Science Credit)

Prerequisite: Physics 11 or Advanced Physics 11

Physics 12 is a continuation of Physics 11. Physics is a human endeavor that sets out to understand the behaviour and structure of matter. It enables students to apply scientific reasoning to problem-solving and develop the skills of a lifelong learner. Core topics are: Force, Motion, Work and Energy (two-dimension), Fields and Electric Circuits, Particle and Wave Models of Matter, and Radioactivity.

ADVANCED PHYSICS 12

(Advanced, Science Credit)

Recommended Prerequisite: Advanced Physics 11 or Physics 11; Mathematics 11 or Advanced Mathematics 11

Advanced Physics 12 is a continuation of Advanced Physics 11, which will cover the same core topics as Physics 12, but in greater depth and at a faster pace. Evaluation will be more numerous, varied, and demanding. An independent experimental research project is a requirement of the course.

SOCIAL STUDIES

Social Studies can be the foundation for an Arts degree that is the basic stepping-stone into careers such as Law, Education, Social Work, Technology, Politics, or Journalism. Students are encouraged to take as many courses as suit their interests. The discipline of Social Studies applies critical thinking to the past, present and ever-changing global and local societies. Students will need to successfully complete at least one Canadian history credit and one global studies credit to meet graduation requirements.

Grade 10

GEOGRAPHY 10

(Academic)

Geography 10 examines physical geography. Students will study 8 units organized into 2 parts. Part A is titled "The Graphic Environment" and includes 3 units: Data Collection; Data Processing and Representation; and Data Interpretation and Utilization. Part B is titled "The Physical Environment" and includes 5 units: Graphic Perspective; Land Environment; Ocean Environment; Atmospheric Environment; and Spaceship Earth.

HISTORY 10

(Academic)

This is a survey course focusing on the foundations of our Western Civilization and the study of History as a social science. It includes some examination of ancient China and India. There are five broad chronological divisions in this history course:

- 1) The Evolution of Humankind/ The Birth of Civilization
- 2) Mesopotamia, Early Civilization
- 3) Egypt, Early Civilization
- 4) Greece, First Western Civilization
- 5) Rome, Ruler of the Ancient World

Computer technology, such as Inspiration, will be used in this class. History at the Grade 10 level provides the student with an opportunity to increase his/her research and analytical skills. A research paper is a requirement for this course.

Grade 11

AFRICAN CANADIAN STUDIES 11

(Academic, Canadian History Credit)

(Offered 2017-2018 & every 2nd year)

The African Canadian Studies course is organized around six modules – Evolution and Change, the African Diaspora, Colonial Expansion, Struggle and Identity, Justice, and Journey toward Empowerment. Presented in a dynamic and interesting manner, this course will equip students with a sound understanding of the history and achievements of people of African descent. Students will discuss the geographical, historical, economic, political and social experiences of a people who have contributed to world history. **This course fulfills the Canadian History requirement for graduation.**

CANADIAN HISTORY 11

(Academic, Canadian History Credit)

The Canadian History 11 course is organized around five continuing or persistent questions in Canada's history. These are questions of current concerns and have deep historical roots in that previous generations of Canadians have had to address these questions. Their efforts have shaped the development of Canada and its identity. These questions form the basis for five of the six units in the course: Globalization, Development, Sovereignty, Governance, and Justice. Historiography and the historical method are central to this course, as it examines Canada's history from the first peoples in North America to the present. **This course fulfills the Canadian History requirement for graduation.**

ECONOMICS 11

(Academic)

This course provides you with a basic introduction to economics, making it easier to relate economic principles to the practicalities of your everyday life. Analyzing economic problems, learning how businesses are run, finding out how we decide to buy what to buy, examining different savings and investment options, learning how a government affects an economy and how your country interacts with other countries will enable you to make more purposeful economic decisions.

GEOGRAPHY 11

(Academic)

(Offered 2018-2019 & every 2nd year)

This course examines contemporary Canadian geography, with its regional and cultural diversities, and examines such general characteristics as Canada's vast area, its northern character, its climate, its economic development, and its geographic regions and sub-regions. Geography 11 also studies such thematic topics as pollution, urbanization, resource development, changing technology, and rural life.

MI'KMAW STUDIES 11

(Academic, Canadian History Credit)

Mi'kmaw Studies 11 provides students with an understanding of historical and contemporary issues in Mi'kmaw society. The course considers the cultural, social, spiritual, and political events, trends and traditions of the Mi'kmaw. The course is an issue-based approach and considers broad concepts such as justice, self-determination, political autonomy, education and schooling, the family, social and political organizations, native rights, spiritual principles, and personal/group identity. Students analyze historical and contemporary issues in Mi'kmaw society, which enables them to achieve a greater understanding of and respect for, Mi'kmaw contributions to society. **This course fulfills the Canadian History requirement for graduation.**

Students cannot receive credit for both Mi'kmaw Studies 10 and 11.

TOURISM 11

(Academic)

Tourism 11 provides students with an introduction to the tourism industry. It offers students a chance to develop the skills and knowledge to enter the tourism industry or post-secondary tourism programs. Tourism 11 includes career planning and employability skills and helps student develop skills in communication, problem solving, organizing and managing information, using technology, as well as working both independently and collaboratively. The two compulsory units are "Fundamentals of Tourism" and "Career Explorations in Tourism". Optional units may include "Transportation, Hospitality, and Attractions", "Tourism Attractions, Travel Trade, and Tourism Services", and "Tourism Development and Design".

Grade 12

BUSINESS MANAGEMENT 12

(Academic)

All students will eventually either own their own business or work for someone who owns the business. Business Management 12 is designed to develop students' understanding of how businesses work. Students will have the opportunity to analyze various leadership and management styles and determine which is more effective with their generation. Students will learn what makes a successful business person in today's world. Entrepreneurship will be a component of the course. Guest speakers are invited into the classroom throughout the year.

GLOBAL ECONOMICS 12

(Academic, Global Studies Credit)

This course will focus on the Global economy. It will apply the concepts of scarcity, opportunity, cost, needs and wants, and limited resources to a global context. Students will develop a more worldly awareness as they compare different economic societies and institutions. Students will apply economic research and analysis skills to selected global economic issues. Major topics include: Foundation For Global Economic Study, Market, Trade, Production and Distribution, Environment, and Economic Ideology.

GLOBAL GEOGRAPHY 12

(Academic, Global Studies Credit)

The impact of human beings on Planet Earth has reached a critical stage. This course is a global view of the state of our planet, how it got to this stage and the interdependency between humankind and the earth's ecosystems. There are five major units: Globalization, Population Issues, Environmental Issues, Resource Management and Consumption, and Urban Geography. Computer technology such as G.I.S. will be used in this class.

ADVANCED GLOBAL GEOGRAPHY 12

(Advanced, Global Studies Credit)

Recommendation: Minimum of 80% in English 11.

Advanced Global Geography 12 will require students to do more extensive analysis of Global Geography. The impact of human beings on Planet Earth has reached a critical stage. This course is a global view of the state of our planet, how it got to this stage and the interdependency between all of humankind and the earth's ecosystems. This course has the five units in Global Geography as well as a sixth unit: Culture and Politics. Computer technology such as G.I.S. will be used in this class.

GLOBAL HISTORY 12

(Academic, Global Studies Credit)

Global History is a course which examines the development of the modern world from World War II to the present, using a case study approach. There are four major content units of study: The Dynamics of Geo-political Power, The Challenge of Economic Disparity, The Pursuit of Justice, and Societal Change. The central question which guides the course is: "How did the world arrive at its current state at the close of the 20th Century"?

ADVANCED GLOBAL HISTORY 12

(Advanced, Global Studies Credit)

Recommendation: Minimum of 80% in English 11.

Advanced Global History 12 will require students to do more extensive analysis of Global History. Students will still address the guiding question for the course through the five units of study but will have additional course work within each unit and will be expected to address some learning outcomes more deeply. Advance Global History 12 students will engage in “seminar” style learning and will be expected to engage in thorough research using the methods of history.

LAW 12

(Academic)

This academic Canadian law course is designed to provide students with knowledge of law and its function in society and the opportunity to develop skills and attitudes that will enable them to understand the process of law. Topics include the Canadian legal system, crimes and crime control, injuries and wrongs, human rights, property rights, promises and agreements, business relations, family relations, and courts and trials. A major focus is the analysis of relevant case law.

SOCIOLOGY 12

(Academic or Open)

Sociology 12 is designed to introduce students to the discipline of Sociology. It is organized into five units – Sociology: A Social Science, Culture: A Shared Human Experience, Socialization: The Shaping of Human Behaviour, Social Organization: Living Together as Humans, and Social Control: Deviant and Conformist Behaviour. Though organized in the same way, Sociology 12 (Academic) has some additional learning outcomes, emphasized more historical and theoretical aspects of sociology, and requires students to independently use research methods appropriate to the discipline of sociology.

Students must make sure that they sign up for the appropriate Sociology course – Academic or Open – when they register.

TECHNOLOGY

The Technology Education program at Hants East Rural High School is designed to help students understand life and work in our modern technological society. Since Technology Education programs develop its content from industrial processes, the terms used to describe the materials, equipment and procedures are similar to those used in industry. However, emphasis is placed on broad areas of learning experiences and is integrated with computer technology where time and facilities permit.

Students may use up to two technology credits to help fulfill the 6 required math/science/technology courses required for graduation.

Grade 10

SKILLED TRADES 10

(Academic, Technology Credit)

Skilled Trades 10 will engage students in an investigation into the skilled trades, the impact that they have on society, and the opportunities that exist for those who pursue a livelihood by working as skilled tradespersons. In addition, Skilled Trades 10 will offer students multiple opportunities to experience the rewards that come from hands-on learning. The course comprises of four topical areas: Safety, Skilled Trades Living, Measurement and Calculations for Trades, and Tools and Materials. The course will require a minimum of 110 hours of instruction, investigation, and physical work. Students will work individually and in groups. They will develop an appreciation for the skilled trades, professionalism and the rewards of such a life career choice.

SKILLED TRADES 10 – FEMALE ONLY

(Academic, Technology Credit)

If there is enough interest, a female only section of skilled trades 10 will be scheduled.

Grade 11

COMMUNICATIONS TECHNOLOGY 11

(Academic, Technology Credit)

Communication Technology 11 is a course that involves a hands-on approach to electronic, print and web communication concepts. It will provide you with hands-on activities that introduce you to a broad spectrum of technological concepts both in traditional media and new media.

There are Eight Modules for Communications Technology 11.

The two mandatory modules for the course include:

1. Fundamentals of Communication Technology
2. Photography

Individual Teachers/Schools will choose four out of the following six Modules to complete the course.

1. Technical Design
2. Graphic Design
3. Web Publishing
4. Animation
5. Broadcasting
6. Video Production

CONSTRUCTION TRADES 11

(Academic, Technology Credit)

Pre-Requisite – Successful Completion of Skills Trades 10 and recommendation from Skilled Trades 10

Construction Trades 11 will continue to focus on the skills developed in Skilled Trades 10 and will define them in a construction environment. Trades that will be examined include carpenter, plumber, electrician, painter-decorator, and floor installer. Working in groups, students will develop skills necessary to work on a construction site. Based around a capstone project, each student will actively use the skills specific to each of the trades required to complete the project. He/she will frame, wire, plumb, and finish a section of the project. Emphasis will be placed on communications, job-site safety, and professional trade practices.

DESIGN 11

(Academic, Technology Credit)

Design 11 involves students in using communications and information technologies to develop solutions to design problems and to conduct inquiries into design issues. Students work independently and as part of design teams to explore design in a range of practical contexts.

Modules for this course include the following:

- Design Fundamentals
- Communications Design
- The Built Environment
- Product Design
- Design Team or Independent Project

ELECTROTECHNOLOGIES 11

(Academic, Technology Credit)

Electrotechnologies 11 enables students to gain an understanding of electrical and electronic systems and subsystems. Students explore a broad range of technology applications, in a hands-on setting, for example, electric motors, appliances, audio and video devices, sensors, control devices, security systems, and control systems.

Modules for this course include the following:

- Electro-assembly
- Power Distribution and Conversion
- Control Systems
- Digital Technology
- Design Team or Independent Project

TRANSPORTATION TRADES 11

(Academic, Technology Credit)

Pre-Requisite: Successful Completion of Skills Trades 10 and recommendation from Skilled Trades 10

Transportation Trades 11 will continue to focus on the skills developed in pre-requisite Skilled Trades 10 and will further define them in an automotive environment. Trades that will be examined include Automotive Painter, Automotive Service Technician, Heavy Duty Equipment Technician, Motorcycle Mechanic, Motor Vehicle Body Repair, Parts person and Truck and Transport Mechanic. Continuing inside a culture of safety, emphasis will be placed on professional trade practices and the essential employability skills.

Grade 12

AUDIO RECORDING PRODUCTION 12

(Offered 2017-2018 & every 2nd year)

(Academic, Technology Credit)

This academic course provides students with a creative program that will address interests in music, technology and popular culture. Through “hands on” application and classroom theory, ARP12 students will develop the skills necessary to create a variety of tape and digital recordings and do live sound production work. In order to fulfill the requirements for this course, students must also complete a minimum of 6 hours of sound tech work outside of class. Students interested in this course should have a background in technology and a strong interest in music. Proficiency on an instrument is beneficial but not required. This course will help prepare students for further studies in music, film and video, live/location sound production and digital media, as well as many other careers currently developing in the areas of sound technology.

FILM AND VIDEO PRODUCTION 12

(Academic, Technology Credit)

Film and Video Production 12 involves students in the production of a film or video. Students work independently and as part of a production team to explore roles in the film industry, develop skills required in production roles, develop a critical awareness of historical and cultural aspects of film, and work through the process of producing a film or video from script development to final edit. Modules for this course include Fundamentals, Production Team Skills, Film Industry Disciplines and Careers, and Film Pre-production, Production, and Post-production. Film and Video Production 12 does **NOT** satisfy the fine arts requirement for graduation.

HOUSING AND DESIGN 12

(Academic, Technology Credit)

Housing and Design 12 will be taught through project-based learning and community connections. The course is designed to be practical and interactive. Course assessment will include an opportunity for students to create a project highlighting their skills in technology, innovation and design. Throughout the curriculum students will be expected to develop their knowledge of related career opportunities and artistic expression through housing applications. Units of study and topics will provide students with the following learning opportunities:

Unit 1: The Housing and Design Skills Portfolio

Unit 2: Career Options related to Housing and Living Environments

Unit 3: Living Spaces: Choices and Decisions

Unit 4: Innovations in Housing Ecosystems

Unit 5: Components of Housing Design and Layout

Unit 6: Interior Design

Student Name: _____

GRADUATION REQUIREMENTS

(Please check if you have completed the course and place "IP" if currently taking the course)

- ___ English 10
- ___ Eng. 11 OR Eng Com 12
- ___ Eng. 12 OR Eng Com 12

- ___ Math 10 (any grade 10 math course) _____
- ___ Math (any grade 11 math course) _____

- ___ 1st Science (Bio, Chem, Sci 10, or Phys)
- ___ 2nd Science (Any science course) _____

- ___ OTHER (Science/Math/Technology) _____
- ___ OTHER (Science/Math/Technology) _____

- ___ Can. History: ACS 11 OR Can. His 11 OR MKS 10/11

- ___ Global Studies: (GI Eco, GI Geo, or GI Hist)

- ___ Phys.Ed. Credit _____

- ___ Fine Arts: _____

- ___ Additional Credit _____
- ___ Additional Credit _____
- ___ Additional Credit _____
- ___ Additional Credit _____
- ___ Additional Credit _____

- ___ No More Than 7 Grade 10 Courses

- ___ 3 other gr 12 credits (can double from above)
English 12, Global 12, plus 3 other gr 12 courses
 - ___ Grade 12 _____
 - ___ Grade 12 _____
 - ___ Grade 12 _____

Course Selections for the next school year

Important - You are selecting your courses for the entire year, not the semester. Students do not determine the semester in which they take courses.

1. Subject: _____
2. Subject: _____
3. Subject: _____
4. Subject: _____
5. Subject: _____
6. Subject: _____
7. Subject: _____
8. Subject: _____

(Please note: you MUST choose 2 alternate courses, which are used only when a course you have chosen is full, not offered, or in the same block as another course you need.)

- Alternate course 1: _____
- Alternate Course 2: _____

3-Year Planner:

1 st . Year	2 nd . Year	3 rd . Year
1. _____	1. _____	1. _____
2. _____	2. _____	2. _____
3. _____	3. _____	3. _____
4. _____	4. _____	4. _____
5. _____	5. _____	5. _____
6. _____	6. _____	6. _____
